
Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXXII

January-June
1973

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Editor

ROBERT M. BERNE, *Charlottesville, Virginia*

Associate Editors

MATTHEW N. LEVY, *Cleveland, Ohio*

HARRY A. FOZZARD, *Chicago, Ill.*

KENNETH L. ZIERLER, *New York, N. Y.*

Editorial Office: P.O. Box 3488, University Station, Charlottesville, Virginia 22903

EDITORIAL BOARD

BERNARD C. ABBOTT, *Los Angeles, Calif.*

J. A. ABILDSKOV, *Salt Lake City, Utah*

ROBERT S. ALEXANDER, *Albany, N. Y.*

ROBERT W. BERLINER, *Bethesda, Md.*

JOHN R. BLINKS, *Rochester, Minn.*

A

Acetylcholine

- action potentials of mitral valve leaflet and adjacent atrium, 731
- radiolabeled frog red blood cell, 718
- transient depolarization induced by acetylcholine in dog atrium and ventricle, 618
- venous relaxation caused by, acting on sympathetic nerves, 259

Acetylcholine

- and atrial automaticity, 618
- cellular mechanism for the generation of ventricular arrhythmias, 600
- conduction block associated with transient depolarization induced by, in Purkinje fibers, 610
- contractility and metabolism in lambs, 471

Action potentials

- change during early hypertrophy, 15
- cycle length and diastolic depolarization, 206
- depressed transmembrane potentials in heart failure, 625
- evidence for summation and voltage dependency in rabbit AV nodal fibers, 170
- of mitral valve leaflet and adjacent atrium, 731
- See also Transmembrane potentials

Activation energies

- ischemia and carnitine palmityl transferase, 340

Activation patterns

- functional transverse interconnections within His bundle and bundle branches, 509

Active state

- in venous smooth muscle, 246

Adenine nucleotides synthesis

- myocardial, 635

Adenosine

- direct control of coronary vascular tone by oxygen, 279
- hypoxia and arterial metabolism, 464
- myocardial adenine nucleotides synthesis, 635

Adrenal cortex

- stimulation of aldosterone secretion by hemorrhage in dogs after nephrectomy and decapitation, 356

Adrenergic influences

- on distal Purkinje system, 323

Adrenergic innervation

- and contractile responses of rabbit saphenous artery, 746

Adrenergic stimulation

- of renin secretion in isolated perfused rat heart, 290

Adrenergic transmission

- venous relaxation caused by acetylcholine, 259

Afferent arterioles

- autoregulation of renin release, 237

Afferent cardiac sympathetic nerve fibers

- cardiac sympathetic reflex in cats, 215
- reflex sympathetic tachycardia, 9

Aging

- changes in diurnal fibrinolytic patterns, 752

Albumin

- transcapillary escape rate, and plasma volume in essential hypertension, 643

Aldosterone

- natriuresis of water immersion, 228
- stimulation by hemorrhage in dogs after nephrectomy and decapitation, 356

Aldosterone antagonist

- canrenoate effects on Purkinje fibers, 501

Aminopeptidase

- substrate requirements for angiotensin I conversion, 415

Anemia

- effect on cardiac output and estimated hepatic blood flow, 530

Angiotensin

- adrenergic stimulation of renin secretion, 290

aldosterone secretion in anephric dogs, 356

autoregulation of renin release, 237

effects of angiotensin I and angiotensin II on canine hepatic vascular resistance, 85

intrarenal role of angiotensin II: homeostatic regulation of renal blood flow, 692

as possible intrarenal hormone in isolated dog kidneys, 550

renin-angiotensin system. See Renin-angiotensin system
substrate requirements for angiotensin I conversion in vivo and in vitro, 415

Animal studies**cats**

- cardio-vagal reflexes, 215
- chronic partial occlusion of pulmonary artery, 15
- depressed transmembrane potentials during induced ventricular failure, 625
- effects of calcium on force-velocity-length relations, 385
- effects of osmolarity on pial arteries, 162
- pressure and flow generated by LV against different impedances, 178
- reflex sympathetic tachycardia, 9
- volume-overload hypertrophy, 140

dogs

- action potentials of mitral valve leaflets, 731
- adrenergic influences on distal Purkinje system, 323
- aldosterone secretion in anephric dogs, 356
- angiotensin as intrarenal hormone, 550
- aortic baroreceptor pathways, 442
- autoregulation of renin release, 228
- baroreceptor inhibition of systemic autoregulation, 673
- conduction block associated with transient depolarization induced by acetylcholine, 610
- cycle length and diastolic depolarization produced by ouabain, 206
- diffusion bypass of xenon in brain circulation, 363
- dynamic anisotropic viscoelastic properties of the aorta, 93
- effects of autonomic nerve stimulation on pacemaker activity and conduction, 27
- effects of sympathetic nerve stimulation on pulmonary vascular resistance, 221
- frequency-dependent Purkinje automaticity, 377
- hepatic blood flow in anemia, 530
- hepatic conversion of angiotensin I, 85
- impaired atrial receptor responses and congestive heart failure, 424
- intrarenal role of angiotensin II, 692
- in situ parasympathetic control of SA and AV nodes, 393
- ischemia and carnitine palmityl transferase, 340
- left bundle function, 509
- mechanism of digitalis arrhythmias, 600
- myocardial performance in hemorrhagic shock, 492
- nonlinearities in wave propagation, 524
- prostaglandins and renal blood flow, 712
- radiolabeled frog red blood cell, 718
- reflex diuresis during tachycardia, 434
- role of baroreceptor reflex, 564
- S-T segment changes and myocardial metabolism during acute coronary insufficiency, 725
- sinus node reentry, 455
- stress distribution in aortic wall, 577
- structural basis for ascending limb of LV function, 297
- substrate requirements for angiotensin I conversion, 415
- sympathetic nervous system in sinus node resistance to high potassium, 348
- tachycardia due to coronary occlusion, 652
- transport of cholesterol between serum and wall, 187
- venous relaxation by acetylcholine, 259

- ventricular pressure-volume ratio, 314
- frogs
 - radiolabeled frog red blood cell, 718
- hamsters
 - microvascular effects of carbon dioxide, 370
- lambs
 - influence of norepinephrine and digitalis on myocardial oxygen consumption, 471
- primates
 - myocardial performance in hemorrhagic shock, 492
- rabbits
 - action of manganese ions and tetrodotoxin on AV nodal transmembrane potentials, 447
 - adrenergic innervation and contractile responses of saphenous artery, 746
 - atrial extrasystoles and sinus rhythm, 480
 - baroreceptors and hypertension, 149
 - biochemical alterations caused by hypoxia in isolated rabbit aorta, 464
 - biphasic vasoconstriction of rabbit ear artery, 49
 - constrictor responses of rabbit ear artery to norepinephrine and to sympathetic nerve stimulation, 323
 - direct control of coronary vascular tone by oxygen, 279
 - left bundle function, 509
 - summation and voltage dependency in AV node, 170
- rats
 - active state in venous smooth muscle, 246
 - adrenergic stimulation of renin secretion in isolated perfused rat kidney, 290
 - brainstem lesions and hypertension, 584
 - comparison of effects of anoxia and ischemia on carbohydrate utilization, 699
 - insulin and anoxic heart, 108
 - low-renin experimental hypertension, 678
 - myocardial adenine nucleotides synthesis, 635
 - postnatal changes in rat ventricular function, 685
 - request for resting heart rates and body weights of rat colonies, 402
 - vascular alpha receptors, 556
- Anoxia**
 - direct control of coronary vascular tone by oxygen, 279
 - effect of insulin on performance and metabolism of isolated perfused rat heart, 108
 - myocardial adenine nucleotides synthesis, 635
- Antiarrhythmic drugs**
 - mechanisms of action, 1
 - sensitivity of cardiac fibers to, 1
- Antidiuretic hormones (ADH)**
 - impaired atrial receptor responses and congestive heart failure, 424
 - natriuresis of water immersion, 228
- Aorta**
 - arterial baroreceptor fibers from aortic region in cervical vagus nerve, 442
 - dynamic anisotropic viscoelastic properties of the aorta in living dogs, 93
 - hypoxia and arterial metabolism, 464
 - influence of flow and pressure on wave propagation, 524
 - stress and strain-energy density through wall thickness in canine aortic segment, 577
- Aortic arch**
 - aortic baroreceptor pathways, 442
 - baroreceptors and hypertension, 149
- Aortic valve**
 - leaflet motion during systole; numerical-graphical determination, 42
- Arachidonic acid**
 - prostaglandins and renal blood flow, 712
- Arrhythmias**
 - adrenergic influences on distal Purkinje system, 329
 - cycle length and diastolic depolarization, 206
 - effects of autonomic nerve stimulation on pacemaker activity and conduction, 27
 - electrophysiological basis for, 1
 - mechanisms of action of antiarrhythmic drugs, 1
 - mechanism of digitalis arrhythmias, 600
 - sinus node reentry, 455
 - ventricular, generation by acetylcholine, 600
- Arteries**
 - comparison of constrictor responses of rabbit ear artery to norepinephrine and to sympathetic nerve stimulation, 323
 - mechanical properties of arterial walls, 149
 - transport of cholesterol between blood and arterial wall, 187
- Arterioles**
 - afferent, autoregulation of renin release, 237
 - effects of osmolarity on pial arteries, 162
- Atheroma**
 - transport of cholesterol between blood and arterial wall, 187
- Atherosclerosis**
 - impairment of diurnal fibrinolytic response, 752
 - mesenchymal response of blood vessel wall, 543
- Atria**
 - acetylcholine and atrial automaticity, 618
 - action potentials of mitral valve leaflet and adjacent atrium, 731
 - dysrhythmias, genesis of, 731
 - electrophysiological properties of anterior mitral valve leaflet and, 731
 - fibrillation
 - sinus node reentry, 455
 - inferior interatrial pathway in dogs, 118
 - sinus node reentry, 455
- Atrial pacing**
 - reflex diuresis during tachycardia, 434
 - sinus node reentry, 455
 - studies in transplanted heart, 268
- Atrial premature systoles**
 - effects on sinus rhythm, 480
- Atrial receptors**
 - in dogs with congestive heart failure, 424
 - reflex diuresis during tachycardia, 434
- Atrial septal defect**
 - volume-overload hypertrophy, 140
- Atrioventricular (AV) conduction**
 - action of manganese ions and tetrodotoxin on AV nodal transmembrane potentials, 447
 - effects of autonomic nerve stimulation on pacemaker activity and conduction, 27
 - electrophysiological studies in denervated transplanted heart, 268
- Atrioventricular (AV) node**
 - action of manganese ions and tetrodotoxin on transmembrane potentials, 447
 - electrophysiological studies in denervated transplanted heart, 268
 - in situ parasympathetic control of sinoatrial nodes and, 393
 - summation and voltage dependency in rabbit AV nodal fibers, 170
- Asphyxia**
 - myocardial adenine nucleotides synthesis, 635
- Atropine**
 - electrophysiological studies in denervated transplanted human heart, 268
 - local nervous control of SA and AV nodes, 393
 - reflex tachycardia due to coronary occlusion, 652
 - venous relaxation caused by acetylcholine, 259
- Automaticity**
 - acetylcholine and atrial automaticity, 618
 - action potentials of mitral valve leaflet and adjacent atrium, 731
 - stimulation frequency and automaticity in Purkinje fiber during ouabain administration, 377
 - studies in denervated transplanted heart, 268
- Autonomic nerve stimulation**
 - effects on pacemaker activity and conduction, 27
- Autonomic nervous system**
 - studies in denervated transplanted heart, 268
- Autoregulation**
 - baroreceptor inhibition of systemic autoregulation, 673
 - evidence for hemodynamic autoregulation of renin release, 237
 - hypoxia and arterial metabolism, 464

B**Baroreceptor reflexes**

- inhibition of systemic autoregulation, 673
- role in daily control of arterial blood pressure, 564

Baroreceptors

- arterial baroreceptor fibers from aortic region in cervical vagus nerve, 442
- brainstem lesions and hypertension, 584
- cardio-vagal reflexes, 215
- characteristics of single aortic and right subclavian baroreceptor fiber activity in rabbits with chronic renal hypertension, 149
- reflex diuresis during tachycardia, 434
- reflex tachycardia due to coronary occlusion, 652

Beta receptors

- adrenergic stimulation of renin secretion, 290
- effect of acute isovolemic anemia on cardiac output and hepatic blood flow, 530

Bicycle exercise

- dopamine- β -hydroxylase, 594

Bigeminal rhythm

- mechanism of digitalis arrhythmias, 600

Biochemical mechanisms

- hypoxia and arterial metabolism, 464

Biphasic vasoconstriction

- of rabbit ear artery, 49

Block. See Heart block**Blood flow**

- analysis of renal ¹³³Xenon washout curves, 71
 - angiotensin as intrarenal hormone, 550
 - cerebral, diffusion bypass of xenon in brain, 363
 - changes in microvascular diameter and oxygen tension induced by carbon dioxide, 370
 - coronary
 - baroreceptor inhibition of systemic autoregulation, 673
 - comparison of effects of anoxia and ischemia on carbohydrate utilization, 699
 - cortical
 - radiolabeled frog red blood cell: new marker, 718
 - effect of anemia on cardiac output and hepatic blood flow, 530
 - effects of angiotensin I and angiotensin II on canine hepatic vascular resistance, 85
 - hypoxia and arterial metabolism, 464
 - influence of flow and pressure on wave propagation in canine aorta, 524
 - local control of coronary vascular tone by oxygen, 279
 - pulmonary alveolar circulation, 117
 - renal
 - intrarenal role of angiotensin II, 692
 - and prostaglandin synthesis, 712
- See also Circulation

Blood pressure

- aldosterone secretion in anephric dogs, 356
- baroreceptors and hypertension, 149
- influence of flow and pressure on wave propagation in canine aorta, 524
- role of baroreceptor reflex, 564
- ventricular pressure-volume ratio, 314

Blood vessel walls

- mesenchymal response of, 543

Blood viscosity

- effect of acute isovolemic anemia on cardiac output and hepatic blood flow, 530

Blood volume

- impaired atrial receptor responses and congestive heart failure, 424

Bohr effect

- changes in microvascular diameter and oxygen tension induced by carbon dioxide, 370

Brain

- diffusion bypass of xenon in brain circulation, 363

Brainstem lesions

- and hypertension, 584

Bromsulphalein clearance

- hepatic blood flow in anemia, 530

Bundle branches

- functional transverse interconnections within His bundle and, 509

C**Calcium**

- biphasic vasoconstriction of rabbit ear artery, 49
- effect on active state in smooth muscle of rat portal vein, 246
- effect on force-velocity-length relations of heart muscle of cats, 385
- sympathetic nervous system in sinus node resistance to high potassium, 348

Canrenoate

- reversal of ouabain-induced electrophysiological effects by potassium canrenoate in Purkinje fibers, 501

Carbohydrate utilization

- comparison of effects of anoxia and ischemia on, 699

Carbon dioxide

- microvascular diameter and oxygen tension induced by, 370

Cardiac output

- baroreceptor inhibition of systemic autoregulation, 673
- effect of acute isovolemic anemia on cardiac output and estimated hepatic blood flow, 530
- myocardial performance in shock, 492
- role of baroreceptor reflex, 564

Cardiodynamics

- myocardial performance in shock, 492

Cardiometer

effect of acute isovolemic anemia on cardiac output and hepatic blood flow, 530
- Stellate ganglia**
sympathetic nerve stimulation and pulmonary vascular resistance, 221
- Stimulation frequency**
and automaticity in Purkinje fiber during ouabain administration, 377
- Stress analysis**
aortic valve leaflet motion during systole, 42
impairment of diurnal fibrinolytic patterns, 752
photoelastic stress analysis of silastic poppets in prosthetic heart valves, 59
- Stress and strain**
anisotropic viscoelastic properties of the aorta, 93
distribution through wall thickness in aortic segment, 577
- Stroke work**
myocardial performance in shock, 492
- Structural fatigue**
photoelastic stress analysis of silastic poppets in prosthetic heart valves, 59
- Sucrose-gap method**
active state in venous smooth muscle, 246
- Sympathectomy**
sympathetic nervous system in sinus node resistance to high potassium, 348
- Sympathetic nervous system**
adrenergic influences on distal Purkinje system, 329
comparison of constrictor responses of rabbit ear artery to norepinephrine and, 323
deoxycorticosterone-saline hypertension, 536
effect on pulmonary vascular resistance, 221
effects of autonomic nerve stimulation on pacemaker activity and conduction, 27
reflex sympathetic tachycardia, 9
reflex tachycardia due to coronary occlusion, 652
and sinus node resistance to high potassium, 348
venous relaxation caused by acetylcholine acting on, 259
- Sympathetic reflexes**
cardio-vagal reflexes in cats, 215
tachycardia, 9
- Sympathetic transmitter**
adrenergic innervation and contractile responses of saphenous artery, 746
- Systoles**
aortic valve leaflet motion during systole: numerical-graphical determination, 42
effects of atrial premature systoles on sinus rhythm in rabbits, 480
- T**
- Tachycardias**
action potentials of mitral valve leaflet and adjacent atrium, 731
reflex diuresis during, 434
reflex due to temporary coronary occlusion in dogs, 652
reflex increases in heart rate elicited by stimulation of afferent sympathetic nerve fibers in cats, 9
- Tetrodotoxin**
action of manganese ions and, on AV nodal transmembrane potentials, 447
venous relaxation by acetylcholine, 259
- Thal's factor**
humoral factors in circulatory shock, 129
- Toxic humoral substances**
in circulatory shock, 129
- Transient depolarization**
induced by acetylthiocholine
cellular mechanism for generation of ventricular arrhythmias by, 600
conduction block associated with, 610
in specialized tissue of dog atrium and ventricle, 618
- Transmembrane action potentials**
change in ventricular action potential configuration during early hypertrophy, 15
cycle length and diastolic depolarization, 206
depressed, in ventricular failure in cats, 625
functional transverse interconnections within His bundle and bundle branches, 509
mechanisms of action of antiarrhythmic drugs, 1
potassium canrenoate effects on Purkinje fibers, 501
- Transmitter concentrations**
comparison of constrictor responses of rabbit ear artery to norepinephrine and sympathetic nerve stimulation, 323
- Transplantation**
electrophysiological studies in denervated transplanted human heart, 268
- Transport kinetics**
transcapillary escape rate of albumin and plasma volume in essential hypertension, 643
- Tricuspid insufficiency**
impaired atrial receptor responses and congestive heart failure, 424
- Tricuspid regurgitation**
impaired atrial receptor responses and congestive heart failure, 424
- Triglycerides**
changes in diurnal fibrinolytic patterns, 752
- Trypsin**
substrate requirements for angiotensin I conversion, 415
- Tyramine**
venous relaxation caused by acetylcholine, 259
- U**
- Ultrastructure**
structural basis for ascending limb of LV function, 297
- Urinary sodium excretion**
autoregulation of renin release, 237
natriuresis of water immersion, 288

 - reflex sympathetic tachycardia, 9
 - sympathetic nerve stimulation and pulmonary vascular resistance, 221
- Vasodilators**
 - microvascular diameter and oxygen tension induced by carbon dioxide, 370
- Vasopressin**
 - reflex diuresis during tachycardia, 434
- Veins**
 - venous relaxation caused by acetylcholine acting on sympathetic nerves, 259

- Velocity.** See Force-velocity-length relations
- Vena caval constriction**
 - angiotensin II on renal blood flow, 692
- Venous relaxation**
 - caused by acetylcholine acting on sympathetic nerves, 259
- Venous smooth muscle**
 - active state, 246
- Ventricle**
 - function
 - myocardial performance in shock, 492
 - postnatal changes in rats, 685
 - pressure-volume ratio, 314
- Vessel wall characteristics**
 - dynamic anisotropic viscoelastic properties of aorta in living dogs, 93
- Volume homeostasis**
 - natriuresis of water immersion, 228
- Volume-overload hypertrophy**
 - myocardial function and energetics in, 140
- Volume receptors**
 - reflex diuresis during tachycardia, 434

W

- Wall shear**
 - transport of cholesterol between blood and arterial wall, 187
- Wall thickness**
 - distribution of stresses and of strain-energy density in aortic segment, 577
- Water**
 - role of mineralocorticoids in natriuresis of water immersion in man, 228
- Wave propagation**
 - influence of flow and pressure on, in canine aorta, 524
- Work, cardiac**
 - myocardial performance in shock, 492

X

- ¹³³Xenon**
 - diffusion bypass of xenon in brain circulation, 363
 - nonlinear regression analysis for analysis of kinetic data and its application to renal ¹³³xenon washout, 71

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXXII

January-June

1973

No. 1 (January)

Brief Reviews: Mechanisms of Action of Antiarrhythmic Drugs. Michael R. Rosen and Brian F. Hoffman	1
Reflex Increases in Heart Rate Elicited by Stimulation of Afferent Cardiac Sympathetic Nerve Fibers in the Cat. Alberto Malliani, Margaret Parks, Robert P. Tuckett, and Arthur M. Brown	9
Chronic Partial Occlusion of the Pulmonary Artery in Cats: Change in Ventricular Action Potential Configuration during Early Hypertrophy. Arthur L. Bassett and Henry Gelband	15
Influence of Brief Vagal and Stellate Nerve Stimulation on Pacemaker Activity and Conduction within the Atrioventricular Conduction System of the Dog. Joseph F. Spear and E. Neil Moore	27
Aortic Valve Leaflet Motion during Systole: Numerical-Graphical Determination. W. Milton Swanson and Richard E. Clark	42
Biphasic Vasoconstriction of the Rabbit Ear Artery. Odd S. Steinsland, Robert F. Furchgott, and Sadashiv M. Kirpekar	49
Photoelastic Stress Analysis of Silastic Poppets in Prosthetic Heart Valves. Harvey Greenfield, Thomas Hampton, Harold Gascoigne, and Willem Kolff	59
A Weighted Least-Squares Technique for the Analysis of Kinetic Data and Its Application to the Study of Renal ¹³³Xenon Washout in Dogs and Man. Ralph B. Dell, Robert Sciacca, Kenneth Lieberman, David B. Case, and Paul J. Cannon	71
Effects of Angiotensin I and Angiotensin II on Canine Hepatic Vascular Resistance. Joseph Di Salvo, Steven Britton, Patrick Galvas, and Thomas W. Sanders	85
Dynamic Anisotropic Viscoelastic Properties of the Aorta in Living Dogs. Dali J. Patel, Joseph S. Janicki, Ramesh N. Vaishnav, and John T. Young	93
Effect of Insulin on the Performance and Metabolism of the Anoxic Isolated Perfused Rat Heart. Arnold M. Weissler, Ruth A. Altschuld, Lorraine E. Gibb, Mary Ellen Pollack, and Fred A. Kruger	108
Letters to the Editor	117
Instructions to Authors	120
News from the American Heart Association	124

No. 2 (February)

Brief Reviews: Blood-Borne Humoral Factors in the Pathophysiology of Circulatory Shock. Allan M. Lefer	129
Normal Myocardial Function and Energetics in Volume-Overload Hypertrophy in the Cat. George Cooper, IV, Francisco J. Puga, Karen J. Zujko, Carlos E. Harrison, and Henry Neal Coleman, III	140

(Continued)

Characteristics of Single Aortic and Right Subclavian Baroreceptor Fiber Activity in Rabbits with Chronic Renal Hypertension. Jennifer E. Angell-James	149
Dependency of Pial Arterial and Arteriolar Diameter on Perivascular Osmolarity in the Cat: A Microapplication Study. M. Wahl, W. Kuschinsky, O. Bosse, and K. Thureau	162
Evidence for Summation and Voltage Dependency in Rabbit Atrioventricular Nodal Fibers. Douglas P. Zipes, Carlos Mendez, and Gordon K. Moe	170
Pressure and Flow Generated by the Left Ventricle against Different Impedances. Gijs Elzinga and Nicolaas Westerhof	178
Transport of ¹⁴C-4-Cholesterol between Serum and Wall in the Perfused Dog Common Carotid Artery. Colin G. Caro and Robert M. Nerem	187
Effect of Changes in Cycle Length on Diastolic Depolarization Produced by Ouabain in Canine Purkinje Fibers. Larry D. Davis	206
A Cardiac Sympathovagal Reflex in the Cat. Peter J. Schwartz, Massimo Pagani, Federico Lombardi, Alberto Malliani, and Arthur M. Brown	215
Effect of Sympathetic Nerve Stimulation on Pulmonary Vascular Resistance in the Dog. Philip J. Kadowitz and Albert L. Hyman	221
Role of Mineralocorticoids in the Natriuresis of Water Immersion in Man. Murray Epstein, James L. Katsikas, and David C. Duncan	228
Evidence for Hemodynamic Autoregulation of Renin Release. Ivar Eide, Einar Løyning, and Fredrik Kiil	237
Active State in the Smooth Muscle of the Rat Portal Vein in Relation to Electrical Activity and Isometric Force. Börje Johansson	246
Venous Relaxation Caused by Acetylcholine Acting on the Sympathetic Nerves. Paul M. Vanhoutte and John T. Shepherd	250
Electrophysiological Studies in the Denervated Transplanted Human Heart: Response to Atrial Pacing and Atropine. David S. Cannom, Anthony F. Graham, and Donald C. Harrison	268
Evidence for Direct Control of Coronary Vascular Tone by Oxygen. Miklos Gellai, James M. Norton, and Reed Detar	279
Adrenergic Stimulation of Renin Secretion in the Isolated Perfused Rat Kidney. Robert Vandongen, W. Stanley Peart, and Grahame W. Boyd ..	290
Structural Basis For the Ascending Limb of Left Ventricular Function. Chaim Yoran, James W. Covell, and John Ross, Jr.	297
News from the American Heart Association	304

No. 3 (March)

Brief Reviews: The Sinus Node as a Servomechanism. Thomas N. James	307
Load Independence of the Instantaneous Pressure-Volume Ratio of the Canine Left Ventricle and Effects of Epinephrine and Heart Rate on the Ratio. Hiroyuki Suga, Kiichi Sagawa, and Artin A. Shoukas ..	314
Comparison of Constrictor Responses of the Rabbit Ear Artery to Norepinephrine and to Sympathetic Nerve Stimulation. John G. Waterson	323
Adrenergic Influences on the Distal Purkinje System of the Canine Heart. Lura Ann Harrison, John Wittig, and Andrew G. Wallace	329

(Continued)

Effect of Chronic Myocardial Ischemia on the Activity of Carnitine Palmitoylcoenzyme A Transferase of Isolated Canine Heart Mitochondria. Jeanie McMillin Wood, Louis A. Sordahl, Robert M. Lewis, and Arnold Schwartz	340
Role of the Sympathetic Nervous System in the Sinus Node Resistance to High Potassium. Mario Vassalle, Jürgen K. Greineder, and Jackson H. Stuckey	348
Stimulation of Aldosterone Secretion by Hemorrhage in Dogs after Nephrectomy and Decapitation. Robert E. McCaa, Connie S. McCaa, Allen W. Cowley, Jr., Cobern E. Ott, and Arthur C. Guyton	356
Diffusion Bypass of Xenon in Brain Circulation. Poul Brodersen, Per Sejrsen, and Niels A. Lassen	363
Changes in Microvascular Diameter and Oxygen Tension Induced by Carbon Dioxide. Brian R. Duling	370
Relationship of Stimulation Frequency to Automaticity in the Canine Purkinje Fiber during Ouabain Administration. Perry M. Hogan, Stephen M. Wittenberg, and Francis J. Klocke	377
Effect of Calcium on Force-Velocity-Length Relations of Heart Muscle of the Cat. Dirk L. Brutsaert, Victor A. Claes, and Mark A. Goethals	385
Selective In Situ Parasympathetic Control of the Canine Sinoatrial and Atrioventricular Nodes. Ralph Lazzara, Benjamin J. Scherlag, Morton J. Robinson, and Philip Samet	393
Letters to the Editor	402
News from the American Heart Association	403

No. 4 (April)

Brief Reviews: Cyclic Adenosine Monophosphate and Cardiac Contractility. Burton E. Sobel and Steven E. Mayer	407
Substrate Requirements for Angiotensin I Conversion In Vivo and In Vitro. Suzanne Oparil, Terry Koerner, Geoffrey W. Tregear, Benjamin A. Barnes, and Edgar Haber	415
Impaired Atrial Receptor Responses in Dogs with Heart Failure Due to Tricuspid Insufficiency and Pulmonary Artery Stenosis. Takako T. Greenberg, William H. Richmond, Reginald A. Stocking, Purshotim D. Gupta, John P. Meehan, and James P. Henry	424
Reflex Diuresis during Tachycardia in the Dog: Evaluation of the Role of Atrial and Sinoaortic Receptors. Kenneth L. Goetz and Gary C. Bond	434
Arterial Baroreceptor Fibers from the Aortic Region of the Dog in the Cervical Vagus Nerve. Cyril S. Ito and Allen M. Scher	442
Action of Manganese Ions and Tetrodotoxin on Atrioventricular Nodal Transmembrane Potentials in Isolated Rabbit Hearts. Douglas P. Zipes and Carlos Mendez	447
Sinus Node Reentry: An In Vivo Demonstration in the Dog. Karlen L. Paulay, P. Jacob Varghese, and Anthony N. Damato	455
Biochemical Alterations Caused by Hypoxia in the Isolated Rabbit Aorta: Correlation with Changes in Arterial Contractility. Donald H. Namm and Joan L. Zucker	464
Influence of Norepinephrine and Digitalis on Myocardial Oxygen Consumption in the Newborn Lamb. S. Evans Downing, John C. Lee, James F. N. Taylor, and Katherine Halloran	471

(Continued)

Effects of Atrial Premature Systoles on Sinus Rhythm in the Rabbit. Herman O. Klein, Donald H. Singer, and Brian F. Hoffman	480
Myocardial Performance in Hemorrhagic Shock in the Dog and Primate. Francis L. Abel and David P. Kessler	492
Reversal of Ouabain-Induced Electrophysiological Effects by Potassium Canrenoate in Canine Purkinje Fibers. Billy K. Yeh and Ralph Lazzara	501
Functional Transverse Interconnections within the His Bundle and the Bundle Branches. Ralph Lazzara, Billy K. Yeh, and Philip Samet	509
Pitfalls in Digital Computation of the Impulse Response of Vascular Beds from Indicator-Dilution Curves. John Gamel, William R. Rousseau, Charles R. Katholi, and Emmanuel Mesel	516
Influence of Flow and Pressure on Wave Propagation in the Canine Aorta. Michael B. Hestand and Max Anliker	524
Effect of Acute Isovolemic Anemia on Cardiac Output and Estimated Hepatic Blood Flow in the Conscious Dog. Gaston Chamarro, Jose A. Rodriguez, Barry Dzindzio, and Elliot Rapaport	530
Letters to the Editor	536
News from the American Heart Association	538

(No. 5 (May))

Brief Reviews: Mesenchymal Response of the Blood Vessel Wall: A Potential Avenue for Understanding and Treating Atherosclerosis. Harvey Wolinsky	543
Angiotensin as a Possible Intrarenal Hormone in Isolated Dog Kidneys. Harold D. Itskovitz, Lee A. Hebert, and John C. McGiff	550
Evidence for Uneven Alpha-Receptor Distribution in the Rat Portal Vein. Bengt Ljung, John A. Bevan, and Che Su	556
Role of the Baroreceptor Reflex in Daily Control of Arterial Blood Pressure and Other Variables in Dogs. Allen W. Cowley, Jr., Jean Francois Liard, and Arthur C. Guyton	564
Distribution of Stresses and of Strain-Energy Density through the Wall Thickness in a Canine Aortic Segment. Ramesh N. Vaishnav, John T. Young, and Dali J. Patel	577
Acute Fulminating Neurogenic Hypertension Produced by Brainstem Lesions in the Rat. Nobutaka Doba and Donald J. Reis	584
Human Serum Dopamine-β-Hydroxylase: Relationship to Hypertension and Sympathetic Activity. David Horwitz, R. Wayne Alexander, Walter Lovenberg, and Harry R. Keiser	594
A Cellular Mechanism for the Generation of Ventricular Arrhythmias by Acetylstrophanthidin. Gregory R. Ferrier, James H. Saunders, and Carlos Mendez	600
Conduction Block Associated with Transient Depolarizations Induced by Acetylstrophanthidin in Isolated Canine Purkinje Fibers. James H. Saunders, Gregory R. Ferrier, and Gordon K. Moe	610
Transient Depolarizations Induced by Acetylstrophanthidin in Specialized Tissue of Dog Atrium and Ventricle. Keitaro Hashimoto and Gordon K. Moe	618
Depressed Transmembrane Potentials during Experimentally Induced Ventricular Failure in Cats. Henry Gelband and Arthur L. Bassett ..	625

(Continued)

De Novo Synthesis of Myocardial Adenine Nucleotides in the Rat: Acceleration during Recovery from Oxygen Deficiency. Heinz-Gerd Zimmer, Christian Trendelenburg, Helmut Kammermeier, and Eckehart Gerlach	635
Transcapillary Escape Rate of Albumin and Plasma Volume in Essential Hypertension. Hans-Henrik Parving and Finn Cystalberg	643
Reflex Tachycardia Due to Temporary Coronary Occlusion in the Conscious Dog. D. Fred Peterson, Robert L. Kaspar, and Vernon S. Bishop	652
News from the American Heart Association	660

(No. 6 (June))

Brief Reviews: Vascular Smooth Muscle Updated. David F. Bohr	665
Total Systemic Autoregulation in the Dog and Its Inhibition by Baroreceptor Reflexes. A. James Liedtke, Charles W. Urschel, and Edward S. Kirk	673
Genetic Influence on the Renin-Angiotensin System: Low Renin Activities in Hypertension-Prone Rats. Junichi Iwai, Lewis K. Dahl, and Knud D. Knudsen	678
Postnatal Changes in Rat Ventricular Function. Sidney F. Hopkins, Jr., Ernest P. McCutcheon, and David R. Wekstein	685
Intrarenal Role of Angiotensin II: Homeostatic Regulation of Renal Blood Flow in the Dog. Ronald H. Freeman, James O. Davis, Stephen J. Vitale, and J. Alan Johnson	692
Comparison of the Effects of Anoxia and Whole Heart Ischemia on Carbohydrate Utilization in Isolated Working Rat Hearts. Michael J. Rovetto, Jeffrey T. Whitmer, and James R. Neely	699
Dependency of Renal Blood Flow on Prostaglandin Synthesis in the Dog. Andrew J. Lonigro, Harold D. Itskovitz, Keith Crowshaw, and John C. McGiff	712
The Radiolabeled Frog Red Blood Cell: A New Marker of Cortical Blood Flow Distribution in the Kidney of the Dog. Richard W. Baehler, Andrew J. Catanzaro, Jay H. Stein, and William Hunter	718
Relationship between Epicardial S-T Segment Changes and Myocardial Metabolism during Acute Coronary Insufficiency. Jan Karlsson, Gordon H. Templeton, and James T. Willerson	725
Electrophysiological Properties of Cardiac Muscle in the Anterior Mitral Valve Leaflet and the Adjacent Atrium in the Dog: Possible Implications for the Genesis of Atrial Dysrhythmias. Andrew L. Wit, John J. Fenoglio, Jr., Bernard M. Wagner, and Arthur L. Bassett	731
Variations in Adrenergic Innervation and Contractile Responses of the Rabbit Saphenous Artery. John A. Bevan and Ralph E. Purdy	746
Impairment of the Diurnal Fibrinolytic Response in Man: Effects of Aging, Type IV Hyperlipoproteinemia, and Coronary Artery Disease. Douglas R. Rosing, David R. Redwood, Pieter Brakman, Tage Astrup, and Stephen E. Epstein	752
Books Received	759
News from the American Heart Association	760
Volume Author Index	767
Volume Subject Index	769

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXXIII

July-December
1973

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Circulation Research

SUBJECT INDEX

VOLUME XXXIII

JULY-DECEMBER, 1973

A

ACTH

- acute stimuli and plasma aldosterone concentration, 313
- aldosterone secretion in anephric man, 555

Acetylcholine

- two-compartment model describing inotropic action of, 532

Action potentials

- depolarization and action potential duration of Purkinje fibers, 39
- origin of polyphasic extracellular wave forms, 465
- Purkinje fibers in MI, 722
- survival of Purkinje fibers after MI, 597

Activation

- time course of activation in myocardium, 291

Adenine

- myocardial nucleotide synthesis, 686

Adenosine

- coronary circulation and heart rejection, 224
- coronary reactive hyperemia, 588
- large and small coronary artery responses, 445
- myocardial nucleotide synthesis, 686
- myocardial reactive hyperemia and coronary vascular reactivity, 267

Adenosine kinase

- myocardial nucleotide synthesis, 686

Adrenal cortex

- acute stimuli and plasma aldosterone concentration, 313

Adrenal glands

- development of severe hypertension and, 516

Adrenalectomy

- ion transport and hypertension, 563

Adrenergic control

- of peripheral circulation in heart failure, 74

Adrenergic outflow

- inhibition to peripheral blood vessels by vagal afferents from cardiopulmonary region, 714

Afferent nerve fibers

- impulses in vagal fibers in veins, atria and arteries of dogs and cats, 87
- vascular reflexes from muscles, 386

Aldosterone

- acute stimuli and plasma aldosterone concentration in anephric man and kidney allograft recipients, 313
- ion transport and hypertension, 563
- in nephrectomized man, 555

American Heart Association

- Scientific Councils, 628

Amino peptidase

- renal handling of angiotensin II, 500

Androgen deficiency

- effects of castration and antiandrogen treatment on aortas of hypertensive male rats, 183

Angiotensin

- acute stimuli and plasma aldosterone concentration, 313
- adrenergic control of peripheral circulation in heart failure, 74
- aldosterone secretion in anephric man, 555
- ion transport and hypertension, 563
- large and small coronary artery responses, 445
- pharmacologic receptor activity of rabbit aorta, 284
- propranolol block of renin release, 82
- radioimmunoassay for angiotensin I, 104
- reactivity of vascular smooth muscle in hypertension, 678
- renal handling of angiotensin II in dogs, 500

Animal studies

- cats
 - abnormal energetics of pressure-induced hypertrophy, 213

- influence on caffeine on onset of unloaded shortening velocity, 291

- vascular endings, 87

dogs

- arrhythmias in Purkinje fibers after MI, 612
- atria in AV transmission, 375
- calcium and digitalis arrhythmias, 508
- carotid reflex and capacity vessels, 22
- cerebral and peripheral vasoconstriction by drugs, 98
- coronary artery flow in aortic stenosis, 34
- coronary circulation and heart rejection, 224
- depolarization and action potential duration in Purkinje fibers, 39
- effect of renal nerve stimulation on renin release, 704
- effects of diphenylhydantoin and digoxin, 175
- effects of norepinephrine and sympathetic stimulation on intestinal oxygen extraction, 166
- flow distribution in normal and ischemic myocardium, 489
- hypoxia and cardiac oxygen consumption, 749
- increased myocardial oxygen consumption and coronary reactive hyperemia, 588
- inhibition of adrenergic outflow to peripheral blood vessels by vagal afferents, 713
- large and small coronary artery responses, 445
- LV cavity and wall geometry, 639
- LV circumferential wall stress, 303
- LV fiber angle and sarcomere length, 656
- methods for computing stroke volume from central aortic pressure, 139
- microelectrode demonstration of Wedensky facilitation in Purkinje fibers, 48
- myocardial blood flow, 113
- myocardial reactive hyperemia and coronary vascular reactivity, 267
- nonlinear analysis of aortic flow in living dogs, 198
- origin of polyphasic extracellular wave forms, 465
- plasma-interstitial fluid distribution, 735
- propranolol and coronary occlusion, 353
- prostaglandins and renal autoregulation, 428
- Purkinje fibers in MI, 722
- receptor discharge during atrial arrhythmias, 672
- renal handling of angiotensin II, 500
- renal intracortical flow with dopamine, 437
- resistance and venous oxygen dynamics during sinusoidal exercise, 337
- smooth muscle series elasticity, 454
- survival of Purkinje fibers after MI, 597
- sympathetic control of abdominal aorta, 149
- vascular endings, 87
- vascular reflexes from muscle afferents, 386
- ventricular conduction delay and arrhythmias during regional hyperkalemia, 521

hamsters

- adrenergic control of peripheral circulation in heart failure, 74

hogs

- length-tension relationship of smooth muscle of carotid artery, 275

lambs

- fetal inactivation of bradykinin, 421

monkeys

- effect of gram-negative bacterial endotoxin, 346

rabbits

- cellophane perinephritis hypertension and its reversal, 105
- circus movement in atrial muscle as mechanism of tachycardia, 54
- force-frequency relationship, 665
- integrative reflex control of heart rate during hypoxia and hyperventilation, 63

- modifications of aortic and vagal reflexes by hypercapnia, 160
 - pharmacologic receptor activity, 284
 - renal PGA_2 as natriuretic factor, 696
 - rats**
 - activation and inhibition of lipoprotein lipase, 403
 - adrenal glands in severe hypertension, 508
 - effects of castration and antiandrogen treatment on aortas of hypertensive male rats, 183
 - ion transport and hypertension, 563
 - low renin in hypertension, 757
 - mechanism of glycogen phosphorylase activation, 412
 - multiple pacemaker sites in spontaneously active vascular muscle, 244
 - myocardial nucleotide synthesis, 686
 - reactivity of vascular smooth muscle in hypertension, 678
 - sodium intake and single nephron glomerular filtration rate, 547
 - sheep**
 - depolarization and action potential duration in Purkinje fibers, 39
 - Anoxia**
 - mechanism of glycogen phosphorylase activation, 412
 - Antibiotics**
 - effect on serum cholesterol levels and intestinal flora, 393
 - Antihypertensive drugs**
 - adrenergic component of renin release induced by vasodilating drugs in rats, 82
 - Aorta**
 - adrenergic control of peripheral circulation in heart failure, 74
 - coarctation
 - adrenal glands in severe hypertension, 508
 - effect of dithiothreitol and N-ethylmaleimide on receptor activity of rabbit aorta, 284
 - effects of castration and antiandrogen treatments in hypertensive rats, 183
 - ion transport and hypertension, 563
 - nonlinear analysis of aortic flow in living dogs, 198
 - sympathetic control of canine abdominal, 149
 - Aortic baroreceptors**
 - circulatory reflexes, 131
 - Aortic nerves**
 - inhibition of adrenergic outflow to peripheral blood vessels by vagal afferents, 714
 - Aortic pressure**
 - method for computing stroke volume from central aortic pressure, 139
 - Aortic reflexes**
 - modifications in hypercapnia, 160
 - Aortic spiral strip**
 - sympathetic control of canine abdominal aorta, 149
 - Aortic stenosis**
 - left circumflex coronary artery hemodynamics in dogs with, 34
 - Apolipoproteins**
 - activation and inhibition of lipoprotein lipase, 403
 - Arrhythmias**
 - antiarrhythmic effects of diphenylhydantoin and digoxin on, 175
 - circus movement in rabbit atrial muscle as mechanism of tachycardia, 54
 - left atrial receptor discharge during atrial arrhythmias, 672
 - microelectrode demonstration of Wedensky facilitation in canine Purkinje fibers, 48
 - Purkinje fibers after MI, 597, 612
 - Purkinje fibers in MI, 722
 - role of calcium in generation of acetylcholine-induced transient depolarizations, 508
 - survival of Purkinje fibers after MI, 597, 617
 - ventricular conduction delay and, during regional hyperkalemia, 521
 - Arteries**
 - cerebral and peripheral vasoconstriction by drugs, 98
 - compliance
 - carotid reflex and capacity vessels, 22
 - impulses in vagal fibers from afferent endings, 87
 - wall
 - atherosclerosis and lipoprotein lipase, 633
 - Arteriosclerosis**
 - nonlinear analysis of aortic flow in living dogs, 198
 - Arteriovenous oxygen difference**
 - intestinal oxygen extraction, 166
 - Artery strip**
 - reactivity of vascular smooth muscle in hypertension, 678
 - Atherogenesis**
 - flow separation hypotheses, 259
 - hemodynamic theories, 259
 - and lipoprotein lipase, 633
 - pressure-related hypotheses, 259
 - wall shear stress, 259
 - Atherosclerosis**
 - effect of antibiotics on serum cholesterol and intestinal flora, 393
 - and lipoprotein lipase, 633
 - Atria**
 - in AV transmission system, 375
 - circus movement as mechanism of tachycardia, 54
 - fibrillation
 - receptor discharge during atrial arrhythmias, 672
 - impulses in vagal fibers from afferent endings, 87
 - premature beats, 54
 - receptor discharge during arrhythmias, 672
 - two-compartmental model describing inotropic action of acetylcholine, 532
 - Atrioventricular node**
 - role of atria in AV transmission, 375
 - Automaticity**
 - calcium and digitalis arrhythmias, 508
 - Purkinje fibers in MI, 722
 - Autoregulation**
 - effect of renal sympathetic nerves on renin release, 704
 - flow distribution in normal and ischemic myocardium, 489
 - large and small coronary artery responses to nitroglycerin and angiotensin, 445
 - prostaglandins and autoregulation of renal blood flow, 428
- B**
- Baroreceptors**
 - control of total systemic vascular capacity by carotid sinus baroreceptor reflex, 22
 - impulses in vagal fibers from afferent endings in veins, atria and arteries of dogs and cats, 87
 - integrative reflex control of heart rate during hypoxia and hyperventilation, 63
 - Baroreflexes**
 - impulses in vagal fibers from afferent endings in veins, atria, and arteries of dogs and cats, 87
 - originating from aortic arch, 131
 - sympathetic nerve activity in normotensives and hypertensives, 9
 - Beta-receptor blockade**
 - propranolol and coronary occlusion, 353
 - propranolol block of renin release, 82
 - vascular reflexes from muscles, 386
 - Bile acids**
 - effect of antibiotics on serum cholesterol levels and intestinal flora, 393
 - Block, unidirectional**
 - circus movement in rabbit atrial muscle as mechanism of tachycardia, 54
 - Blood flow**
 - coronary
 - hypoxia and cardiac oxygen consumption, 749
 - myocardial reactive hyperemia and coronary vascular reactivity, 267
 - coronary reactive hyperemia, 588
 - distribution in normal and ischemic myocardium, 489

- effects of endotoxin fractions, 346
 - effects on norepinephrine and sympathetic stimulation on intestinal oxygen extraction, 166
 - nonlinear analysis of aortic flow in living dogs, 198
 - redistribution of renal intracortical blood flow with dopamine, 437
 - regional distribution of diffusible tracers and carbonized microspheres, 573
 - resistance and venous oxygen dynamics during sinusoidal exercise, 337
 - vascular resistance and venous oxygen changes following brief tetanus, 323
 - See also Circulation
 - Blood pressure**
 - control of total systemic vascular capacity by carotid sinus baroreceptor reflex, 22
 - effect of renal nerve stimulation on renin release, 704
 - effect of sodium balance on prostaglandins and, 539
 - ion transport and hypertension, 563
 - renin in perinephritis hypertension, 105
 - sympathetic nerve activity in normotensives and hypertensives, 9
 - Blood volume**
 - plasma-interstitial fluid distribution, 735
 - Books received, 758**
 - Bradykinin**
 - effects of gram-negative bacterial endotoxin fractions, 346
 - inactivation in pulmonary vascular bed of fetal lambs, 421
 - Branching systems**
 - morphometry of human pulmonary arterial tree, 190
 - Brief tetanus**
 - vascular resistance and venous oxygen changes following brief tetanus, 323
- C**
- Caffeine**
 - influence on onset of unloaded shortening velocity of cat heart muscle, 291
 - Calcium**
 - effect on acetylcholinesterase-induced transient depolarizations, 508
 - force-velocity-length relations and, 627
 - influence of caffeine on onset of unloaded shortening velocity of heart muscle, 291
 - reactivity of vascular smooth muscle in hypertension, 678
 - Capacitance vessels**
 - cardiopulmonary depressor nerves, 713
 - Capillaries**
 - transcapillary fluid exchange in renal cortex, 1
 - Capillary blood flow**
 - intestinal oxygen extraction, 166
 - Capillary exchange**
 - plasma-interstitial fluid distribution following intravenous infusions, 735
 - Capillary permeability**
 - regional myocardial blood flow, 573
 - Capsaicin**
 - impulses in vagal fibers from afferent endings, 87
 - Carbon dioxide**
 - aortic and vagal reflexes in hypercapnia, 160
 - Cardiac output**
 - control of total systemic vascular capacity by carotid sinus baroreceptor reflex, 22
 - effects of gram-negative bacterial endotoxin fractions, 346
 - measurement of total myocardial blood flow in dogs with ^{45}K and scintillation camera, 113
 - methods for computing stroke volume from central aortic pressure, 139
 - Cardiopulmonary area**
 - mechanoreceptors, 131
 - Cardiopulmonary depressor nerves**
 - inhibition of adrenergic outflow to peripheral blood vessels by vagal afferents, 714
 - Cardiopulmonary reflexes**
 - modifications of aortic and vagal reflexes by hypercapnia, 160
 - Carotid arteries**
 - cerebral and peripheral vasoconstriction by drugs, 98
 - length-tension relationship of smooth muscle in hog carotid artery, 275
 - series elastic and contractile elements in vascular smooth muscle, 454
 - Carotid baroreceptors**
 - cardiopulmonary depressor nerves, 713
 - Carotid sinus**
 - control of total systemic vascular capacity by carotid baroreceptor reflex, 22
 - Catecholamines**
 - adrenergic control of peripheral circulation in heart failure, 74
 - Cells**
 - reduction by propranolol of myocardial necrosis following coronary occlusion, 353
 - Cerebral arteries**
 - vasoconstriction by drugs, 98
 - Chemoreflexes**
 - impulses in vagal fibers from afferent endings in veins, atria, and arteries of dogs and cats, 87
 - integrative reflex control of heart rate during hypoxia and hyperventilation, 63
 - Chloramphenicol**
 - effect on cholesterol and intestinal flora, 393
 - Chlortetracycline**
 - effect on cholesterol and intestinal flora, 393
 - Cholesterol**
 - atherosclerosis and lipoprotein lipase, 633
 - effect of neomycin and other antibiotics on bile acid degradation and levels of cholesterol, 393
 - Chymotrypsin**
 - renal handling of angiotensin II, 500
 - Circulation**
 - coronary
 - during rejection of heterotopically transplanted dog heart, 224
 - fetal inactivation of bradykinin, 421
 - peripheral
 - adrenergic control in heart failure, 74
 - reflex control from mechanoreceptors in cardio-aortic area, 131
 - renal PGA_2 as natriuretic factor, 696
 - Circus movement**
 - in rabbit atrial muscle as mechanism of tachycardia, 54
 - Collagen**
 - effects of castration and antiandrogen treatment on aortas of hypertensive male rats, 183
 - ion transport and hypertension, 563
 - Compliance**
 - assessment of passive elastic stiffness for isolated heart muscle and intact heart, 233
 - Computer analysis**
 - myocardial blood flow, 113
 - Computer simulation studies**
 - plasma-interstitial fluid distribution, 735
 - Conduction block**
 - microelectrode demonstration of Wedensky facilitation in canine Purkinje fibers, 48
 - Conduction defects**
 - ventricular conduction delay and arrhythmias during regional hyperkalemia, 521
 - Conduction system**
 - atria in AV transmission, 375
 - Congenital subaortic stenosis**
 - left circumflex coronary artery hemodynamics in conscious dogs with, 34
 - Contractile components**
 - length-tension relationship of smooth muscle of hog carotid artery, 275
 - vascular smooth muscle, 454
 - Contractility**
 - hypoxia and cardiac oxygen consumption, 749
 - mechanism of glycogen phosphorylase activation, 412
 - varies with force-frequency relationship, 665

Coronary arteries

- differential responses of large and small, to nitroglycerin and angiotensin, 445
- left circumflex hemodynamics in dogs with aortic stenosis, 34
- occlusions
 - flow distribution in normal and ischemic myocardium, 489
 - myocardial reactive hyperemia and coronary vascular reactivity, 267
 - propranolol and, 353
 - reactive hyperemia, 588
 - survival of Purkinje fibers after MI, 597
- ventricular conduction delay and arrhythmias during regional hyperkalemia, 521

Coronary circulation

- during rejection of heterotopically transplanted dog heart, 224
- left circumflex coronary artery hemodynamics in dogs with congenital subaortic stenosis, 34

Coronary reactive hyperemia, 267

- effect of increased oxygen consumption, 588

Coronary vascular reactivity

- coronary circulation and heart rejection, 224
- myocardial reactive hyperemia and, in dogs, 267

Coronary vessels

- circulatory reflexes from mechanoreceptors in cardio-aortic area, 131

Corticosterone

- ion transport and hypertension, 563

Cortisol

- acute stimuli and plasma aldosterone concentration, 313
- aldosterone secretion in anephric man, 555

Cyclic AMP

- mechanism of phosphorylase activation, 412

D**Depolarization**

- and action potential duration in Purkinje fibers, 39
- effect of calcium on acetylcholinesterase-induced transient depolarizations, 508
- length-tension relationship of smooth muscle of hog carotid artery, 275
- microelectrode demonstration of Wedensky facilitation in canine Purkinje fibers, 48
- spontaneous diastolic, 613

Digitalis

- effect of calcium on acetylcholinesterase-induced transient depolarizations, 508

Digoxin

- correlation of antiarrhythmic effects of diphenylhydantoin and, 175

Diphenylhydantoin

- correlation of antiarrhythmic effects of digoxin and, 175

Dipyridamole

- coronary circulation and heart rejection, 224

Disulfide bridge

- pharmacologic receptor activity of rabbit aorta, 284

Dithiothreitol

- effect on receptor activity of rabbit aorta, 284

Diuresis

- receptor discharge during atrial arrhythmias, 672

Dopamine

- redistribution of renal intracortical blood flow and, 437

Drugs

- pharmacologic receptor activity of rabbit aorta; effects of DTT and NEM, 284

E**Elastic modulus**

- passive elastic stiffness in cardiac muscle, 233

Elastic stiffness

- assessment of passive elastic stiffness for isolated and intact hearts, 233

Elastin

- effects of castration and antiandrogen treatment on aortas

- of hypertensive rats, 183

- ion transport and hypertension, 563

Electrical activity

- origin of polyphasic extracellular wave forms, 465

Electrical stimulation

- control of renin release, 704
- length-tension relationship of smooth muscle of hog carotid artery, 275

Electrodes

- multiple pacemaker sites in spontaneously active vascular muscle, 244
- ventricular conduction delay and arrhythmias during regional hyperkalemia, 521

Electrograms, surface

- circus movement in rabbit atrial muscle as mechanism of tachycardia, 54

Electrophysiology

- arrhythmias in Purkinje fibers after MI, 612
- atria in AV transmission, 375
- canine Purkinje cells in one-day-old MI, 722
- multiple pacemaker sites in spontaneously active vascular muscle, 244
- survival of Purkinje fibers after MI, 597

Electrotonus

- microelectrode demonstration of Wedensky facilitation in canine Purkinje fibers, 48

Endopeptidase

- renal handling of angiotensin II, 500

Endotoxin

- effects of gram-negative bacterial endotoxin in monkeys, 346

Energetics

- mechanism for abnormal energetics of pressure-induced hypertrophy of cat myocardium, 213

Engineering mechanics

- for successive states in canine LV myocardium
- cavity and wall dynamics, 639
- fiber angle and sarcomere length, 656

Entrance block

- arrhythmias in Purkinje fibers after MI, 613

Enzymes

- activation and inhibition of lipoprotein lipase by apolipoproteins, 403

Epinephrine

- atria in AV transmission, 375
- mechanism of glycogen phosphorylase activation, 412

Evans blue dye

- coronary circulation and heart rejection, 224

Excitability

- microelectrode demonstration of Wedensky facilitation in canine Purkinje fibers, 48

Excitation-contraction coupling

- influence of caffeine on onset of unloaded shortening velocity of heart muscle, 291

Exercise

- left circumflex coronary artery hemodynamics in dogs with congenital subaortic stenosis, 34
- resistance and venous oxygen dynamics during sinusoidal exercise, 337
- vascular resistance and venous oxygen changes following brief tetanus, 323

Exit block

- arrhythmias in Purkinje fibers after MI, 613

Extracellular potentials

- origin of polyphasic extracellular wave forms, 465

Extrasystole

- atria in AV transmissions, 375

F**Fecal bacterial flora**

- effect of antibiotics on cholesterol levels and, 393

Femoral artery

- adrenergic control of peripheral circulation in heart failure, 74

Ferrocyanide clearance

- sodium intake and single nephron glomerular filtration rates, 547

Fiber angles

canine LV fiber angle and sarcomere length, 656

Fibrillation**atrial**

receptor discharge during atrial arrhythmias, 672

ventricular

conduction delay and arrhythmias during regional

hyperkalemia, 521

propranolol and coronary occlusion, 353

Flow separation hypotheses

atherogenesis, 259

Fluid distribution

plasma-interstitial fluid distribution following intravenous infusions in dogs, 735

Fluid volume

aldosterone secretion in anephric man, 555

Focal length

canine LV cavity and wall geometry, 639

Force-frequency relationship

basis for new index of contractility, 665

Force-velocity-length relationships

calcium and, 627

influence of caffeine on onset of unloaded shortening velocity of heart muscle, 291

Force-velocity relationships

abnormal energetics in pressure-induced hypertrophy of cat myocardium, 213

Frank-Starling law

force-frequency relationship, 665

Furosemide

sodium balance and prostaglandins, 539

G**Geometry**

canine LV cavity and wall geometry, 639

Glomerular filtration rate

control of renin release, 704

effect of sodium intake and single nephron, 547

sodium balance and prostaglandins, 539

Glomerular ultrafiltration

flow dependence of, and peritubular capillary absorption, 1

Glyceryl trinitrate

myocardial reactive hyperemia and coronary vascular reactivity, 267

Glycogenolysis

mechanism of phosphorylase activation, 412

Glycoside

effects of digoxin and diphenylhydantoin on, 175

Granulocytopenia

effects of gram-negative bacterial endotoxin fractions, 346

Growth

effects of castration and antiandrogen treatment on aortas of hypertensive male rats, 183

H**Heart failure**

adrenergic control of peripheral circulation in, 74

Heart rate

atria in AV transmission, 375

integrative reflex control in rabbit during hypoxia and hyperventilation, 63

Hemodialysis

acute stimuli and plasma aldosterone concentration in anephric man and kidney allograft recipients, 313

aldosterone secretion in anephric man, 555

Hemodynamic studies

atherogenesis, 259

hypoxia and cardiac oxygen consumption, 749

left circumflex coronary artery hemodynamics in dogs with aortic stenosis, 34

His bundle electrograms

ventricular conduction delay and arrhythmias during regional hyperkalemia, 521

Histamines

pharmacologic receptor activity of rabbit aorta, 284

Hydralazine

adrenergic component of renin release induced by vasodilating antihypertensive drugs in rats, 82

Hypercapnia

modifications of aortic and vagal reflexes in rabbits, 160

Hyperemia

coronary reactive, 588

left circumflex coronary artery hemodynamics in dogs with congenital subaortic stenosis, 34

myocardial reactive hyperemia and coronary vascular reactivity in dogs, 267

resistance and venous oxygen dynamics during sinusoidal exercise, 337

time course of vascular resistance and venous oxygen changes following brief tetanus, 323

Hyperkalemia

ventricular conduction delay and arrhythmias during regional hyperkalemia, 521

Hypertension

adrenal glands in development of severe, 516

altered ion transport in vascular smooth muscle, 563

antihypertensive drugs

adrenergic component of renin release induced by vasodilating drugs in rats, 82

comparative effects of castration and antiandrogen treatments on aortas of hypertensive and normotensive male rats, 183

comparison of sympathetic nerve activity in normotensives and hypertensives, 9

low renin in, 757

renal

reactivity of vascular smooth muscle, 678

renin in perinephritis hypertension and its reversal in rabbits, 105

Hypertrophy

left circumflex coronary artery flow in aortic stenosis, 34

mechanism for abnormal energetics of pressure-induced hypertrophy in cats, 213

Hyperventilation

integrative reflex control of heart rate during, 63

Hypoxanthine

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME XXXIII

July-December
1973

No. 1 (July)

Brief Reviews: Transcapillary Fluid Exchange in the Renal Cortex. William M. Deen, Channing R. Robertson, and Barry M. Brenner	1
Comparison of Sympathetic Nerve Activity in Normotensive and Hypertensive Subjects. B. Gunnar Wallin, Wolfram Delius, and Karl-Erik Hagbarth	9
Control of Total Systemic Vascular Capacity by the Carotid Sinus Baroreceptor Reflex. Artin A. Shoukas and Kiichi Sagawa	22
Left Circumflex Coronary Artery Hemodynamics in Conscious Dogs with Congenital Subaortic Stenosis. R. Lee Pyle, Howard S. Lowensohn, Edward M. Khouri, Donald E. Gregg, and Donald F. Patterson	34
Depolarization and Action Potential Duration in Cardiac Purkinje Fibers. Makoto Arita and Borys Surawicz	39
Microelectrode Demonstration of Wedensky Facilitation in Canine Cardiac Purkinje Fibers. John C. Bailey, Joseph F. Spear, and E. Neil Moore	48
Circus Movement in Rabbit Atrial Muscle as a Mechanism of Tachycardia. Maurits A. Allesie, Felix I. M. Bonke, and Francien J. G. Schopman	54
Integrative Reflex Control of Heart Rate in the Rabbit during Hypoxia and Hyperventilation. Paul I. Korner, John Shaw, Malcolm J. West, Judith R. Oliver, and Roland B. Hilder	63
Adrenergic Control of the Peripheral Circulation in Cardiomyopathic Hamsters with Heart Failure. Allyn L. Mark, Howard E. Mayer, Phillip G. Schmid, Donald D. Heistad, and Francois M. Abboud	74
Adrenergic Component of Renin Release Induced by Vasodilating Antihypertensive Drugs in the Rat. William A. Pettinger, William B. Campbell, and Kent Keeton	82
Impulses in Slowly Conducting Vagal Fibers from Afferent Endings in the Veins, Atria, and Arteries of Dogs and Cats. Hazel M. Coleridge, John C. G. Coleridge, Albert Dangel, Cecil Kidd, John C. Luck, and Peter Sleight	87
Responsiveness of Isolated Cerebral and Peripheral Arteries to Serotonin, Norepinephrine, and Transmural Electrical Stimulation. Noboru Toda and Yuzo Fujita	98
Cellophane Perinephritis Hypertension and Its Reversal in Rabbits: Effects on Plasma Renin, Renin Substrate, and Renal Mass. Duncan J. Campbell, Sandford L. Skinner, and Allan J. Day	105
Measurement of Total Myocardial Blood Flow in Dogs with ⁴³K and the Scintillation Camera. Yasushi Ishii, William J. MacIntyre, Walter H. Prichard, and Richard W. Eckstein	113
Instructions to Authors	123
News from the American Heart Association	127

No. 2 (August)

Brief Reviews: Circulatory Reflexes from Mechanoreceptors in the Cardio-Aortic Area. Conrad L. Pelletier and John T. Shepherd	131
--	-----

Evaluation of Several Methods for Computing Stroke Volume from Central Aortic Pressure. C. Frank Starmer, Philip A. McHale, Frederick R. Cobb, and Joseph C. Greenfield, Jr.	139
Sympathetic Control of Canine Abdominal Aorta. Mária Gerová, Ján Gero, Svatopluk Doležel, and Ida Blazková-Huzuláková	149
Modifications of the Aortic and Vagal Depressor Reflexes by Hypercapnia in the Rabbit. Norbert T. Ott and John T. Shepherd	160
Effects of Norepinephrine and Sympathetic Stimulation on Extraction of Oxygen and ^{86}Rb in Perfused Canine Small Bowel. A. Pitt Shepherd, David Mailman, Thomas F. Burks, and Harris J. Granger	166
Correlation of Antiarrhythmic Effects of Diphenylhydantoin with Digoxin-Induced Changes in Myocardial Contractility, Sodium-Potassium Adenosine Triphosphatase Activity, and Potassium Efflux. Robert E. Goldstein, Stanley C. Penzotti, Karen S. Kuehl, Kirk H. Prindle, Jr., Clifford A. Hall, Elwood O. Titus, and Stephen E. Epstein. . .	175
Comparative Effects of Castration and Antiandrogen Treatment on the Aortas of Hypertensive and Normotensive Male Rats. Harvey Wolinsky	183
Morphometry of the Human Pulmonary Arterial Tree. Siam Singhal, Robert Henderson, Keith Horsfield, Keith Harding, and Gordon Cumming	190
Nonlinear Analysis of Aortic Flow in Living Dogs. Sung C. Ling, H. Bülent Atabek, William G. Letzing, and Dali J. Patel	198
Mechanism for the Abnormal Energetics of Pressure-Induced Hypertrophy of Cat Myocardium. George Cooper, IV, Richard M. Satava, Jr., Carlos E. Harrison, and Henry Neal Coleman, III	213
Studies on the Coronary Circulation during Rejection of the Heterotopically Transplanted Dog Heart. Henry J. Paoloni, David E. L. Wilcken, and Athol W. J. Lykke	224
Assessment of Passive Elastic Stiffness for Isolated Heart Muscle and the Intact Heart. Israel Mirsky and William W. Parmley	233
Multiple Pacemaker Sites in Spontaneously Active Vascular Muscle. Kent Hermsmeyer	244
News from the American Heart Association	251

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF THE HISTORY OF ARTS
AND ARCHITECTURE
1100 EAST 58TH STREET
CHICAGO, ILLINOIS 60637

TO THE HONORABLE
THE PRESIDENT OF THE UNIVERSITY OF CHICAGO
AND THE FACULTY
I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the appropriate authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

Enclosed for the President and Faculty are two copies of a report on the subject of the proposed changes in the curriculum of the Department of the History of Arts and Architecture, which I have the honor to submit to you.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the appropriate authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the appropriate authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

SUPPLEMENT
TO
Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUMES XXXII and XXXIII

January-December
1973

Author and Subject Indexes to Supplement I: Hypertension—Vol. XXI—Hypertension in Man and the Experimental Animal James C. Hunt, M.D., Guest Editor are published in that supplement.

AMERICAN HEART ASSOCIATION, INC.

SUPPLEMENTS
to
CIRCULATION RESEARCH

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION
44 East 23rd Street, New York, N. Y. 10010

EDITOR OF SUPPLEMENTS

Elliot Rapaport, M.D.

Supplements to CIRCULATION RESEARCH will be published occasionally for binding annually in a separate volume entitled Supplements to CIRCULATION RESEARCH. Each supplement's page numbers will begin with page one. Supplements to CIRCULATION RESEARCH will be indexed separately at the end of the year.

Volumes XXXII and XXXIII

January-December
1973

**I. HYPERTENSION—VOL. XXI: HYPERTENSION IN MAN AND
THE EXPERIMENTAL ANIMAL**

(May, 1973)

Editorial	
Irvine H. Page	I-1
Importance of Adaptive Changes in Vascular Design for Establishment of Primary Hypertension, Studied in Man and in Spontaneously Hypertensive Rats	
B. Folkow, M. Hallbäck, Y. Lundgren, R. Sivertsson, and L. Weiss ..	I-2
Suppression of Renin Activity by Hypothalamic Stimulation	
John E. Zehr, and Eric O. Feigl	I-17
Hemodynamic and Myocardial Function in Young and Old Normotensive and Spontaneously Hypertensive Rats	
Marc A. Pfeffer, and Edward D. Frohlich	I-28
Importance of Potassium in the Regulation of Aldosterone Production	
John Boyd, Patrick J. Mulrow, W. Pearson Palmore, and Patricia Silva	I-39
Physiological Receptors as Physicochemical Entities	
Robert J. Lefkowitz, and Edgar Haber	I-46
Adrenergic Receptors	
Mark Nickerson	I-53
Alterations in Intrarenal Blood Flow Distribution: Methods of Measurement and Relationship to Sodium Balance	
J. H. Stein, S. Boonjarern, C. B. Wilson, and T. F. Ferris	I-61
Plasma and Extracellular Fluid Volumes in Hypertension	
Harriet P. Dustan, Robert C. Tarazi, Emmanuel L. Bravo, and Richard A. Dart	I-73
A Model of the Human Circulation: Regulation by Autonomic Nervous System and Renin-Angiotensin System, and Influence of Blood Volume on Cardiac Output and Blood Pressure	
John A. Luetscher, David G. Boyers, James G. Cuthbertson, and David F. McMahon	I-84
Renin Subgroups in Essential Hypertension: Further Analysis of Their Pathophysiological and Epidemiological Characteristics	
Hans R. Brunner, Jean E. Sealey, and John H. Laragh	I-99
Radioimmunoassay: Practices and Pitfalls	
Rosalyn S. Yalow	I-116
Genetics in Hypertension: A Perspective	
Edmond A. Murphy	I-129
Genetic Control of Blood Pressure and Corticosteroid Production in Rats	
John P. Rapp, Knud D. Knudsen, Junichi Iwai, and Lewis K. Dahl	I-139

(Continued)

Use of Angiotensin II Antagonists in Experimental Hypertension

F. M. Bumpus, S. Sen, R. R. Smeby, C. Sweet, C. M. Ferrario, and
M. C. Khosla I-150

**Effects of a Specific Competitive Antagonist of Angiotensin II on
Arterial Pressure and Adrenal Steroid Secretion in Dogs**

J. Alan Johnson, and James O. Davis I-159

**Identification of a New Vasodepressor Factor (VDF) in Arterial
Tissue and Plasma of Dogs and Humans**

Julian Rosenthal, John Paddock, and William Hollander I-169
